

Question 1

Correct

Mark 1.00 out of 1.00

Flag question

Identify the correct jQuery events:

hover :	Mouse Event	✓
keypress :	Key Event	✓
focus :	Form Event	✓
blur :	Form Event	✓
scroll :	Window Event	✓

Question 2

Correct

Mark 1.00 out of 1.00

Flag question

Write the correct jQuery code to select the specified element below:

Selects all elements that are the parent of another element, including text.

Answer: `$(":parent")` ✓

Question 3

Correct

Mark 1.00 out of 1.00

Flag question

Re-arrange the jQuery code to hide and show the div tag with the id 'div2' which contains some html elements.

The form tag with the name 'myForm' contains a drop down box with the id 'select1' for setting the marital status. When the user sets the marital status as 'Married', then a div tag with the id 'div2' should be displayed which contains the html elements for getting spouse name, no. of children, etc. If the user set the marital status as 'Unmarried', then it should hide the div tag.

Note:

<div> tag id : div2

Dropdown box id : #select1

Dropdown box name:mstate

Form name : myForm

```
✓ <script>
✓ $(document).ready(function() {
✓ $('#select1').change(function(){
  var name=document.myForm.mstate.value;
✓ if(name=='Married'){
✓ $('#div2').show(); }
✓ else
✓ $('#div2').hide();
  });
✓ });
✓ </script>
```

Question

4

Correct

Mark 1.00 out of 1.00

Flag question

Drag and drop the correct options:

- ✓ - This selector selects all elements that are children of a paragraph element
- ✓ - Selects all elements matched by <div> that contain an element matched by <p>
- ✓ - This selector matches links with a class of specialClass declared within <p> elements
- ✓ - Selects all elements that have no children
