

Inline Forms

Create a Bootstrap compact form layout in which form controls are placed side-by-side (in-line). The form should contain elegant form fields with appropriate Bootstrap classes.

The snapshot of the web page is given below:

Image 1:

Image 2:

Hints:

1. Create a div belongs to Bootstrap's compact class which should contain all required elements like form, input fields, buttons and other div tags.
2. Choose appropriate bootstrap class for the form tag to get the form layout mentioned above.
3. Create an email filed with id as "inputEmail" and set the place holder as specified in the given figures.
4. Create a password filed with id as "inputPassword" and set the place holder as specified in the given figure.
5. All the input fields should be required fields and should belongs to the bootstrap form control class
6. The 'Login' button should be a bootstrap primary submit button created using button tag with id as "login" and also set the log-in icon of Bootstrap Glyphicon components using a span tag.

```
inline.html
