

Average mark greater than 80

Write a query to display list of student ids and average mark in 2 decimal places if their average mark is greater than 80. Give an alias to average mark as AVG_MARK. Sort the result based on average mark.

Refer the below schema diagram:

group5.sql

```
1 SELECT student_id, round(avg(value),2) as AVG_MARK FROM mark GROUP BY student_id
2 having avg(value)>80 ORDER BY AVG_MARK;
```
