

Create Mark table

Refer the below schema and create the table mark.

Refer the below schema diagram:

ddl5.sql

```
1 create table mark(  
2     value number,  
3     subject_id number,  
4     student_id number,  
5     constraint pk primary key(subject_id, student_id),  
6     constraint fk_subject foreign key(subject_id) references subject(subject_id),  
7     constraint fk_student foreign key(student_id) references student(student_id)  
8 );|
```
