

## Student - Department Based on City

Write a query to display list of students name and their department name who all are from Coimbatore. Sort the result based on students name

Refer the below schema diagram:

joins3.sql

```
1 select student_name, department_name from student join department
2 on student.department_id = department.department_id
3 where lower(city) = 'coimbatore'
4 order by student_name;
```
