

CSS Effect

Create a page that will display an image changing effect on mouse over in a file named imgeffect.html.

Initially the page would be displayed as below with only an image of apple (apple.jpg)

When we mouse over this image a transition effect on the image needs to happen, changing the image from apple to mango (mango.jpg). The page then should display as below,

Create a webpage using the fields below:

A <div> tag, with "step1" as class.

- The width and height are 250px and 300px respectively.
- Initially it must be appear with the image "apple" with 100px margin.

For the transision, change the CSS3 properites of the div tag named as "step1" to

- Width as 350px, height as 300px and change the image from apple to mango with the same margin value.

Note: Please Don't use short hand styles with respect to background. While styling, please, do not specify any of the values of attributes within " ".

```
imgeffect.html  apple.jpg  mango.jpg
1 |!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <title>Change Image on Hover in CSS</title>
5 <style type="text/css">
6
7 .step1 {
8     width: 250px;
9     height: 300px;
10    background-image: url("apple.jpg");
11    background-repeat: no-repeat;
12    margin: 100px;
13 }
14 .step1:Hover {
15     width: 350px;
16     height: 300px;
17     background-image: url("mango.jpg");
18     background-repeat: no-repeat;
19 }
20
21 </style>
22 </head>
23 <body>
24     <div class="step1"></div>
25 </body>
26 </html>
```
