

## Maximum score in the particular subject

Write a query to find the name of the student(s) who has scored maximum mark in Software Engineering. Sort the result based on name.

Hint: Use Correlated Sub query or Inline view.

Refer the below schema diagram:

subquery8.sql

```
1 select student_name from student
2 join mark using(student_id)
3 join subject using(subject_id)
4 where subject_name = 'Software Engineering'
5 and value = (select max(value) from mark join subject using (subject_id)
6              where subject_name = 'Software Engineering')
7 order by student_name;
```
