

Assume you have been assigned to develop a web site with lot of animations and effects, where you have to use jQuery libraries. But for applying certain effects, you will have to make some changes in the library files. If so, which version of the jQuery libraries should you use?

- ☐ Beta version
- ☐ Deployment version
- ☒ Development Version
- ☐ Production version

Here is a jquery code:

```
$(document).ready(function(){});
```

Why do we place all jQuery methods inside this code?

- ☐ To enable the DOM to load jQuery
- ☐ It shows where jQuery starts and ends
- ☒ To prevent jQuery code from running before the document is fully loaded.
- ☐ Because jQuery is never compiled

Look at the following jQuery selector: `$("div #intro .head")`. What does it select?

- ☐ The first element with id="head" inside any div element with class="intro"
- ☐ All elements with class="head" inside the first div element with id="intro"
- ☒ All div elements with id="intro" or class="head"
- ☐ All div elements with class="intro" or id="head"

John, a web developer wants to select a single paragraph Element with the id 'p_id'. Help the John to choose the correct code to perform the above task.

- ☐ `$('.p_id')`
- ☒ `$('#p_id')`
- ☐ `$('&p_id')`
- ☐ `$(p_id')`

Choose the correct symbol that represents jQuery function?

☒ \$

☐ &

☐ %

☐ #
