

Mobile model with max sales

Write a query to display the mobile model name which has made the maximum sales. Give an alias for the maximum sales as "MAX_SALES". Sort the records based on model name in descending order.

(Hint: Use mobile_master and sales_info tables to retrieve records)

model.sql

```
1 select Model_Name, count(SalesId) as MAX_SALES from mobile_master
2 inner join sales_info using(ime_no)
3 group by Model_Name
4 having count(SalesId) = (select max(count(SalesId)) from sales_info
5                          join mobile_master using(ime_no)
6                          group by Model_Name)
7 order by Model_Name desc;
```
