

## Change Case of Guest Name

Write a query to display the guest names who are from Ooty. For instance, the guest name "geeta govind" should be displayed as "Geeta Govind". Give alias name as GUESTNAME. Sort the result based on Guest Name.

Hint: Address can be in any case. Use like operator to fetch city from address.

sample.sql

```
1 SELECT INITCAP(name) as GUESTNAME from guest WHERE lower(address) LIKE '%ooty%'
2 ORDER BY GUESTNAME;
```
