# Display Student Name along with age

Write a query to display student ID, First name and age. Sort the result based on student ID.

[Note : Age can be calculated using DOB and give alias name as age]

Student - Course Enrollment Management

COURSE		
PK	courseid	number(4)
	CourseName	varchar2(20)
	Duration	number(2)
	Fees	number(7,2)

STUDENT		
PK	StudId	Number(4)
	FirstName	Varchar2(20)
	LastName	Varchar2(20)
	Street	Varchar2(20)
	City	Varchar2(20)
	DOB	Date

REGISTRATION		
FK	CourseID	number(4)
FK	StudId	number(4)
	DOJ	Date

PK-Primary key
FK-Foreign key

sample.sql

```sql
SELECT StudId,FirstName,trunc(months_between(sysdate,DOB)/12) AS age
FROM student ORDER BY StudId;
```
