## Subject with Staff Details

Write a query to display the subjectname, code and staff name who handles that subject, ordered by code in ascending order.

College Management System(CMS)

Department
- department_id number --> PK
- department_name varchar(30)
- department_block_number number

Student
- student_id number --> PK
- student_name varchar(30)
- address varchar(40)
- city varchar(30)
- department_id number --> FK

PK-- Primary Key
FK-- Foreign Key

Staff
- staff_id number --> PK
- staff_name varchar(30)
- department_id number--> FK

Subject
- subject_id number -->PK
- subject_name varchar(30)
- subject_code varchar(10)
- staff_id number --> FK

Mark
- value number
- subject_id number--> PK,FK
- student_id number-->PK,FK

join7.sql

```sql
1  select subject_name,subject_code,staff_name from staff
2  join subject on staff.staff_id=subject.staff_id
3  order by subject_code;
```
