Question 4

Correct

Mark 1.00 out of 1.00

⚑ Flag question

Which of the following tag provides a hint to the user of what can be entered in the field, on placing the cursor on the corresponding field?

Select one:

○ required

◉ placeholder ✔

○ title

○ pattern

Consider the below code snippet:

<form action="success.html" novalidate="novalidate">

<input type="checkbox" name="Qualification" value="UG">UG

<input type="checkbox" name="Qualification" value="PG">PG

<input type="checkbox" name="Qualification" value="12th" required="required"> 12th

</form>

The validation code has been written to check atleast one checkbox. If the code is not working, what could be the reason ?

Select one:

○ The required attribute will not work for checkbox.

◉ In the form attibute, we have given novalidate. ✔

○
 cannot be used in between the input tag.

○ The value for novalidate should be "validate".
