## Student Name based on Department

Write a query to display list of students name who all are from IT department. Sort the result based on students name in descending.

Hint:Use Subquery

Refer the below schema diagram:

```sql
1  select student_name from student join department
2  on student.department_id=department.department_id
3  where upper(department_name) = 'IT'
4  order by student_name desc;
```
